4 MAY 65

At 0805/Mrs ██████ called regarding her sightings on the night of 2 May 65. She had seen in the Journal Herald that the observations she had made were ECHO I, ECHO II, and Pegasus. She went along with seeing two satellites but not three, as the one seemed to hover and zig zag while going across the sky. Major Quitanilla explained that the eye plays tricks on a person while they watch the sky and a certain object. The object only appears to stop and hover while in actuality it is still moving in its perfect orbit. Mrs. ██████ accepted this and thanked the Major for his help in identifying what she and her family observed.

Experts Identify UFOs As Man-Made Satellites

People who think they have been seeing UFOs (undidentified flying objects) lately, have had stars in their eyes and artificial ones at that.

Investigations of sightings made over the weekend have identified the UFOs as three man-made satellites, spokesmen at Wright-Patterson Air Force base said yesterday.

One report called in to the base duty officer Sunday night "turned out to be three of them," an official said.

"The person saw Pegasus at 8:39 p.m., Echo II at 9:20 p.m. and Echo I at 9:45 p.m.," he said.

More calls are expected at the base in the several days "because there is going to be a field day this week with all three of them appearing at prime time," the official said.
